

High-energy astrophysics

Carmelo Evoli

Academic Year 2023-2024

Contents

| | | |
|----------|---|----------|
| 1 | Introduction to Galactic Cosmic Rays | 2 |
| 1.1 | Overview of Cosmic Rays: Nature, Origin, and History | 2 |
| 1.2 | Unsolved Questions in High-Energy Astroparticle Physics | 2 |
| 1.3 | Galactic Cosmic Rays vs. Extragalactic Cosmic Rays | 2 |
| 2 | Plasma Physics Fundamentals | 2 |
| 2.1 | Introduction to Plasma: Properties and Characteristics | 2 |
| 2.2 | Plasma Equations and Magnetohydrodynamics (MHD) | 2 |
| 2.3 | Magnetized Plasmas in Astrophysics | 2 |
| 3 | Charged Particle Transport in Magnetic Fields | 2 |
| 3.1 | Lorentz Force and Particle Trajectories | 2 |
| 3.2 | Gyro-Motion and Particle Orbits in Magnetic Fields | 2 |
| 3.3 | Pitch-Angle Scattering and Diffusion | 2 |
| 4 | Diffusive Shock Acceleration | 2 |
| 4.1 | Shock Waves in Cosmic Environments | 2 |
| 4.2 | Fermi Acceleration Mechanisms | 2 |
| 4.3 | Cosmic Ray Spectrum Formation | 2 |
| 5 | Energy Loss Processes for High-Energy Particles | 2 |
| 5.1 | Interaction of Cosmic Rays with Matter | 2 |
| 5.2 | Hadronic Interactions and Particle Energy Losses | 2 |
| 6 | Cosmic Ray Transport in Galaxies | 2 |
| 6.1 | Transport Equations and Models | 2 |
| 6.2 | Galactic Halo Models and Cosmic Ray Distributions | 2 |
| 6.3 | Cosmic ray transport in Starburst Galaxies | 2 |
| 7 | Gamma-Ray and Neutrino Emissions in Cosmic Rays | 2 |
| 7.1 | Gamma-Ray Production Mechanisms | 2 |
| 7.2 | Neutrinos as Messengers of High-Energy Cosmic Processes | 2 |
| 7.3 | Sources of Gamma-Rays and Neutrinos: Supernovae and diffuse emissions | 2 |
